

## ABSTRACT OF THE DISCLOSURE

A portable, foldable bath device for use on a bed or other support surface, includes:

- (a) a generally planar, flexible, water impervious bottom wall;
- (b) at least one flexible, water impervious side wall attached along one of its side edges to the periphery of the bottom wall; and
- (c) an aperture in one of the walls of the bath device, the aperture being occludable by a closure mechanism;

wherein the side wall is convertible from a generally horizontal, planar, folded position adjacent the bottom wall to a generally vertical, erect, open position extending in an upward direction from the generally horizontal bottom wall.
